PROJECTS

Atm theft dedtection and prevention system	2025
Developed an automated system to detect ATM theft using vibration sensors and Node MCU. The system locks the ATM door during theft attempts, activates alarms, and alerts authorities with real-time location and camera access. Addressed key issues like lack of guards, poor CCTV, and delayed police response	
Trash Here	2024
Trash Here is a digital waste management app that helps users report and manage waste efficiently. People can log the type of waste they have, request collection, and track disposal. The app connects users with recycling and composting services, promotes proper segregation, and rewards eco-friendly actions. It makes waste collection faster, more organized, and environmentally sustainable.	
Gesture to Speech(Simple outline project)	2024
Gesture-to-Speech is a project that converts hand gestures into audible speech. It uses sensors or a camera to capture gestures, processes them using algorithms or machine learning, and maps them to predefined words or sentences. The output is generated through a text-to-speech engine. It helps people with speech or hearing disabilities communicate easily.
